

Bifocal Contact Lenses

ABBA Optical, Inc.

Menicare GP CDS Cleaning, Disinfecting and Storage Solution 4 oz

Use whenever lenses are to be cleaned and disinfected. Helps to eliminate deposits accreting on gas permeable contact lenses and hard contact lenses. When stored in Menicare GP CDS solution for a minimum of six (6) hours, harmful microorganisms are destroyed on the lens surface. Storing lenses in Menicare GP CDS solution keeps lenses clean and hydrated.

Contains:

Lauryl sulfate salt of imidazoline, octylphenoxyethoxyethanol, and preserved with benzyl alcohol 0.3% and disodium edetate 0.5%.

How Supplied:

Menicare GP CDS solution is supplied in 4 oz. (118 mL) bottles. Bottles are sealed with tamper-evident neck band and marked with a lot number and expiration date, and are packed in a unit carton.

Periodic Protein Cleaning:

Your eye care professional may recommend periodic Enzyme cleaning (or periodic cleaning) to remove protein deposits on the lens. For Periodic Enzyme cleaning or periodic protein cleaning, the patient should carefully follow the instructions in the periodic Enzyme cleaning (or periodic protein cleaning labeling).
