

Bifocal Contact Lenses

ABBA Optical, Inc.

Menicare GP WRW Wetting & Re-Wetting Drop 1 oz (30 mL)

Contains polymeric wetting and cushioning agents to wet and lubricate the lens prior to insertion, insuring a more comfortable wearing cycle. Menicare GP WRW Drop can be used during the wearing cycle by placing 1 or 2 drops directly into eye to rewet and hydrate the lens.

Contains:

Sodium and potassium chloride salts, polyvinylpyrrolidone, polyvinyl alcohol, hydroxyethyl cellulose, sodium bisulfite 0.02%, preserved with benzyl alcohol 0.1%, sorbic 0.05% and disodium edetate 0.1%.

How Supplied:

Menicare GP WRW Drop is supplied in 1 oz. (30 mL) bottles. Bottles are sealed with tamper-evident neck band and marked with a lot number and expiration date and are packed in a unit carton.
